

FMCQ ESG Market Strategy

Strategic analysis of ESG-driven revenue opportunities across 50 Indian cities

Made with GAMMA

Why ESG Strategy Matters Now

Market Reality

Indian FMCG market spans 50 cities with combined SOM exceeding \$7,000M. Traditional low-ESG approaches limit revenue potential.

Strategic Imperative

TCFD scenario analysis shows 25-40% revenue gap between high-ESG and low-ESG strategies across all markets.

Revenue Premium

Average increase with high-ESG strategy

Top Performer

Bangalore shows highest ESG impact

Minimum Gain

Lowest ESG premium across markets

High vs Low ESG Revenue

Bangalore Leader

High ESG: \$801M vs Low ESG: \$554M

Chennai Strong

High ESG: \$684M vs Low ESG: \$615M

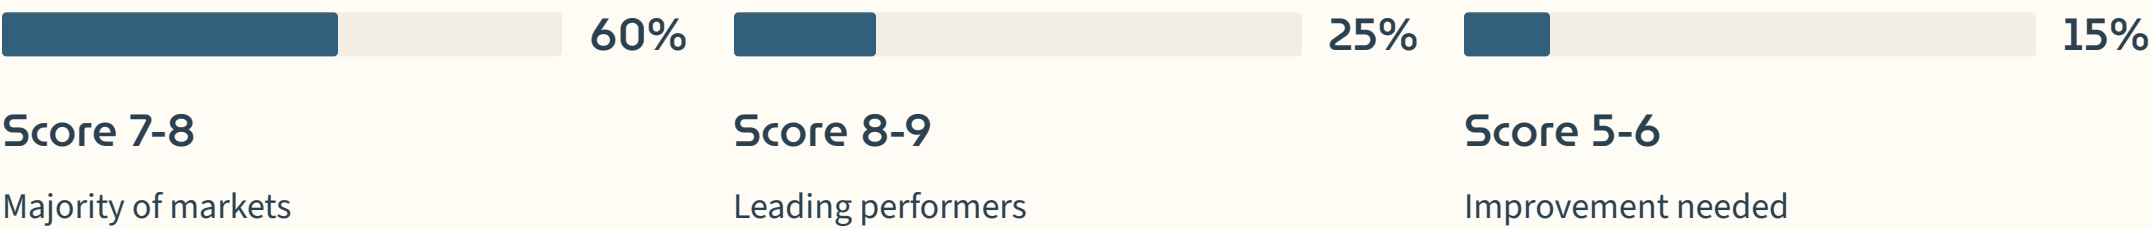

Pune Qap

High ESG: \$131M vs Low ESG: \$113M

Sustainability Score Distribution

BRSR-aligned scoring across 50 cities

Recommended ESG Initiatives

Energy Efficiency Programs

Target cities with high energy consumption (Pune, Chennai, Mumbai). Reduce GWh usage through renewable integration and process optimization.

Sustainable Packaging

Deploy across all 50 cities. Focus on markets with high SOM for maximum revenue impact. Align with circular economy principles.

Strategic Takeaways

01

Prioritize High-SOM Cities

Focus ESG investments in Bangalore, Chennai, Mumbai, and Hyderabad for maximum revenue impact

02

Address Emissions Leaders

Target Pune, Chennai, and Mumbai for immediate GHG reduction programs

03

Scale Sustainable Packaging

Roll out across all 50 cities to capture full ESG revenue premium

04

Monitor BRSR Metrics

Track sustainability scores quarterly and adjust initiatives for continuous improvement

Next Steps

Immediate Actions

- Finalize ESG initiative budgets
- Launch pilot programs in top 3 cities
- Establish baseline measurements

3-Year Horizon

- Achieve 30% GHG reduction
- Reach sustainability score of 8+ across all markets
- Capture full ESG revenue premium
